# At Aptiv, we are born to move

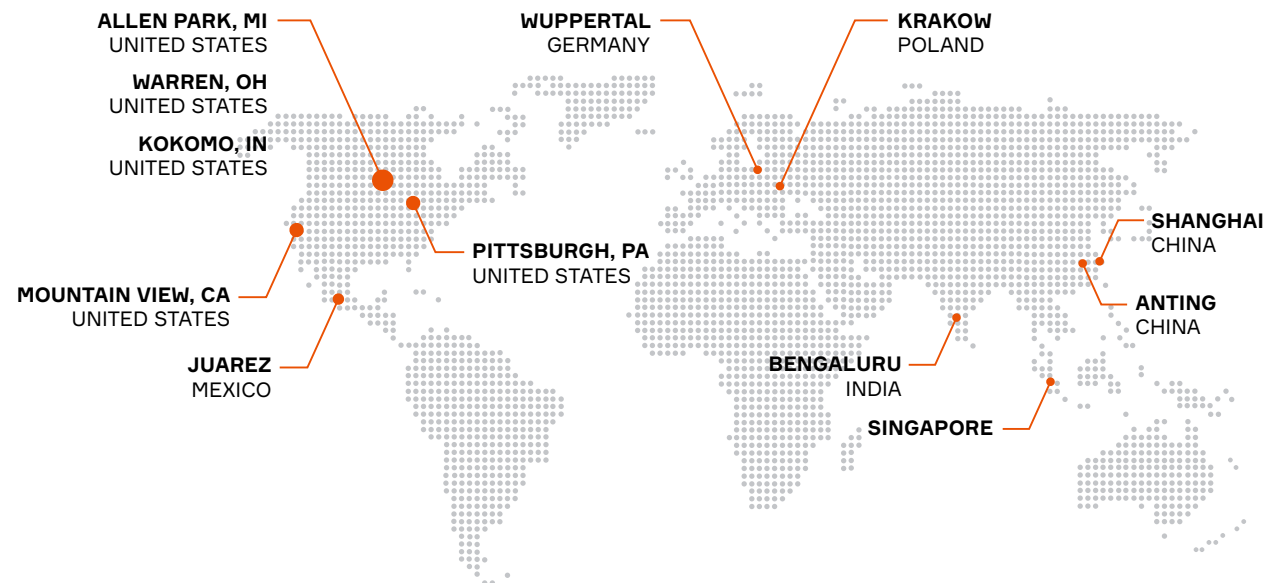

Aptiv is a **global technology company** that develops safer, greener and more connected solutions enabling the future of mobility.

Headquartered in Dublin, Aptiv has approximately 150,000 employees and operates 14 technical centers, as well as manufacturing sites and customer support centers in 45 countries.

## Major Design Centers Worldwide

# The world of transportation

**Aptiv has been a trusted automotive supplier for decades, introducing practical innovations in the areas of safety, efficiency, and connectivity. The transportation market has been advancing in these areas and Aptiv can offer product solutions designed for the tougher operational and environmental requirements.**

Commercial and recreation vehicles are often exposed to higher levels of environmental forces, including vibration, dust, water, debris, and temperature. To protect the integrity of the electrical system, high performance connection systems are required.

To deliver superior performance, a number of complex factors in the electrical system must be addressed in the component design, including sealing, locking features, and materials.

# A new generation of transportation fleets

As fleets and owner operators are looking to increase profitability and decrease negative footprint on the environment, vehicle manufacturers are considering alternative powertrains to meet new demands of their customers.

Alternative powertrain solutions now include more sophisticated ICE (Internal Combustion Engine), hybrid, battery electric, CNG (Compressed Natural Gas), and fuel cell technologies. And the infrastructure development is keeping up with the pace of vehicle technology advancements. The trend for a greener future is now becoming a reality across the world

through truck, bus, and construction/agriculture fleet operations. And it has a potential to positively impact thousands of people through decreased pollution and improved air quality.

These alternative powertrains, however, increase the complexity of the electrical architecture, requiring

higher reliability. The transportation market also has more stringent performance requirements as vehicles are exposed to higher operational temperature and extreme environmental forces. These two factors drive the demand for more robust connection systems designed specifically with the market's unique conditions in mind

# A connection system designed for **the future**

The CTCS connector and CTS terminal families have been designed to meet the demanding requirements of commercial and heavy duty applications, specifically to address new emission regulations and enable the generation of environmentally-friendly vehicles.

The CTCS (Compact Transportation Connection System) family offers an integrated system solution to a wide variety of vehicle interconnections, ranging from unsealed cab to sealed on-engine applications, to options with flame-retardant material, to performance-boosting accessories. It was designed to meet or exceed a range of industry and customer validation standards and deliver improved performance over the competition.

This heavy duty connection system provides superior resistance against vibration and environmental forces, protecting the integrity of the electrical system from high operating temperatures, debris, and water. CTCS serves as a reliable backbone to all vehicle electronics, including powertrain, safety, entertainment, and telematics.

# Robust features, meaningful benefits

1

## Versatility of application

- **A complete portfolio** of connectors, accessories, terminals, and seals
- **Terminal flexibility:** interchangeable with other industry terminals
- **Mounting flexibility:** Panel (for pass through and bulkhead), Strap/Clip (for wire tie or clip), and Bracket (for bulkhead)
- **Application flexibility:** perfect for cab, chassis, engine compartment, and on-engine applications
- **Offered** in both non-V0 (HB) and V0 materials

2

## Unparalleled reliability and performance

- **Improved vibration resistance**
  - Sine vibration up to 30.6 G; random vibration up to 18 Grms, 330 hrs/axis
  - Robust back shells further improve strain relief performance
- **High temperature rating**
  - Up to -40 °C to +140 °C
  - Superior terminal design, with high pre-load stainless steel spring, reduces relaxation of terminal base body
- **Superior environmental protection**
  - Additional connector features for protection against debris ingress
  - IP67, IP69 (IEC) and IP6K7, IP6K9K (ISO) sealing rating for highest protection against water intrusion

3

## Designed for the transportation market

- **Robust solution** from an electrical component expert with over 100 years of experience designing and implementing superior solutions for the industry
- **Meeting or exceeding** a wide range of commercial vehicle validation standards

## High pre-load stainless steel spring

Superior vibration and relaxation resistance

## Additional structure on back shells

Designed for maximum mechanical robustness and mud and dust protection

- 1 Heavy ribbing
- 2 Strapping points fully integrated with cover for maximum retention of harness
- 3 Four shrouded locks

## Pre-staged locking mechanism (SP and XP Series)

- 1 Pre-staging features in slider to aid in proper mating
- 2 Slider lock is firmly retained and only released upon installation onto mating connector

## Mounting flexibility

Aptiv provides a range of mounting options for maximum application flexibility.

# A wide family **range**

1

## Connectors

CTCS connectors offer wide application versatility and a perfect match for your design needs.

CTCS connector range covers:

- Inline and device applications
- 2 through 62 way configurations
- 1.5, 2.8, 6.3 mm blade sizes, and mixed cavity configurations
- Sealed and unsealed applications
- Flame-retardant material option (V0)
- Panel, strap/clip, and bracket male mounting options
- Two different lock assist mechanisms for sealed connectors: Slider lock and Lever lock

2

## Terminals

CTCS connectors are compatible with both Aptiv and other industry terminals. Aptiv's CTS tanged terminals offer premium vibration, temperature, and sealing performance.

Terminal range covers:

- 1.5, 2.8, and 6.3 mm blade sizes
- 0.08-6.0 mm<sup>2</sup> / 28-10 awg cable sizes
- Tin, silver, and gold plating options

3

## Seals

Both cable seal and cavity plug options are available, covering a wide range of cable gages and all CTCS cavity sizes.

4

## Accessories

CTCS housings can be supplemented with optional accessories, which can further improve vibration performance and harness interconnection integrity. The following accessories, produced by an Aptiv brand HellermannTyton, are available:

- 180° or 90° back shells
- 1.0-3.5 mm<sup>2</sup> fixing slides
- Caps
- Clips and wire ties

For more information visit [www.hellermanntyton.com](http://www.hellermanntyton.com)

5

## Hand crimp tools

Hand crimp tools are available for CTS female and male terminals. No solder required.

Cable range:	0.35 - 6.0 mm <sup>2</sup>
Material:	CuFe
Available plating:	Sn, Ag
Current carrying capacity:	52A/Sn/20°C/6mm <sup>2</sup>

## PERFORMANCE

Category	Sn	Ag
Operating temperature:	135°C	170°C
Through resistance:	≤ 2 mΩ	≤ 2 mΩ
Crimp resistance:	≤ 1 mΩ	≤ 1 mΩ
Mating force:	max. 20 N	max. 20 N
Unmating force:	max. 13 N	max. 13 N
Mating cycles:	20	20
