

Omron Solutions for Healthcare

Omron Sensor Overview

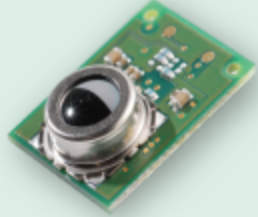

Human Sensing

Embedded-type Human Vision Components

- Face detection
- Face recognition (Mr. Alex)
- Expression estimation (happiness)
- Age estimation (age 25)
- Gender estimation (male)
- Face Direction estimation (Right 90°)
- Gaze estimation
- Body detection
- Hand detection
- Blink estimation

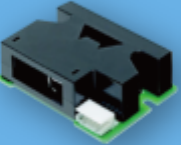

MEMS Thermal Sensor

- Position of people
- Number of people (2)

Condition Sensing

Air Quality Sensor

- Dust

MEMS Flow Sensor

- Airflow

Seismic Sensor

- Earthquake

MEMS Thermal Sensor

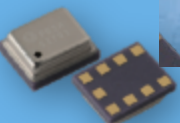

- Temperature

Light Convergent Reflective Sensor

- Object presence/absence

MEMS Barometric Pressure Sensor

- Absolute pressure

Photomicrosensor

- Object presence/absence

Environment Sensor

- Temperature
- Humidity
- Absolute pressure
- Light
- Noise
- UVI

Omron Rules for Medical applications

Conditions to work on Medical applications:

- All projects have to be confirmed through Business Theme Sheet
- Class is based on EU categorization.
- Class III is prohibited to sell
- Class IIB –we can sell only products developed for medical

	Class I	Class IIA	Class IIB	Class III	Remark
Products developed for general use	Y	Y	N	N	
Products developed for Medical use	Y	Y	Y	N	Ex: EE-SX4320 in next page

Contact Omron representative for confirming each project.

Photomicrosensor for medical use

- OMRON developed SMD type PMS for medical devices.
- Possible to be installed in up to class IIb medical devices.
- Improved the quality control system and the production process in order to guarantee the medical quality.

Slot Width	2mm		3mm		4mm		5mm	
Output	P-Tr	P-IC	P-Tr	P-IC	P-Tr	P-IC	P-Tr	P-IC
Standard type	SX1320 SX1321 (2ch)	SX4320	SX1330	No	SX1340	SX3340 SX4340	SX1350	SX3350 SX4350

Medical type	No	Available SX4320-M1	No	No	No	No	No	No
--------------	----	------------------------	----	----	----	----	----	----

- Only one type is available at this moment.
- The specification is same as standard one (EE-SX4320)

Sensors by Application - Healthcare

Insulin pump

Oxygen concentrator

Smart inhalers

Smart bed / Warming blankets

Clean room flow detection

2JCIE projects for respiratory

Monitor the environment condition which causes respiratory disease for better control of symptom

Item	Specification
Sensors	Temperature, Humidity, Light, Pressure, Noise, Acceleration, VOC(volatile Organic Compounds)
Power Supply	USB Supply
Interface	Bluetooth *1 , USB2.0
Dimensions	Approx. 14.9mm × 29.1mm × 7.0 mm
Weight	Approx. 10g

BLE

User

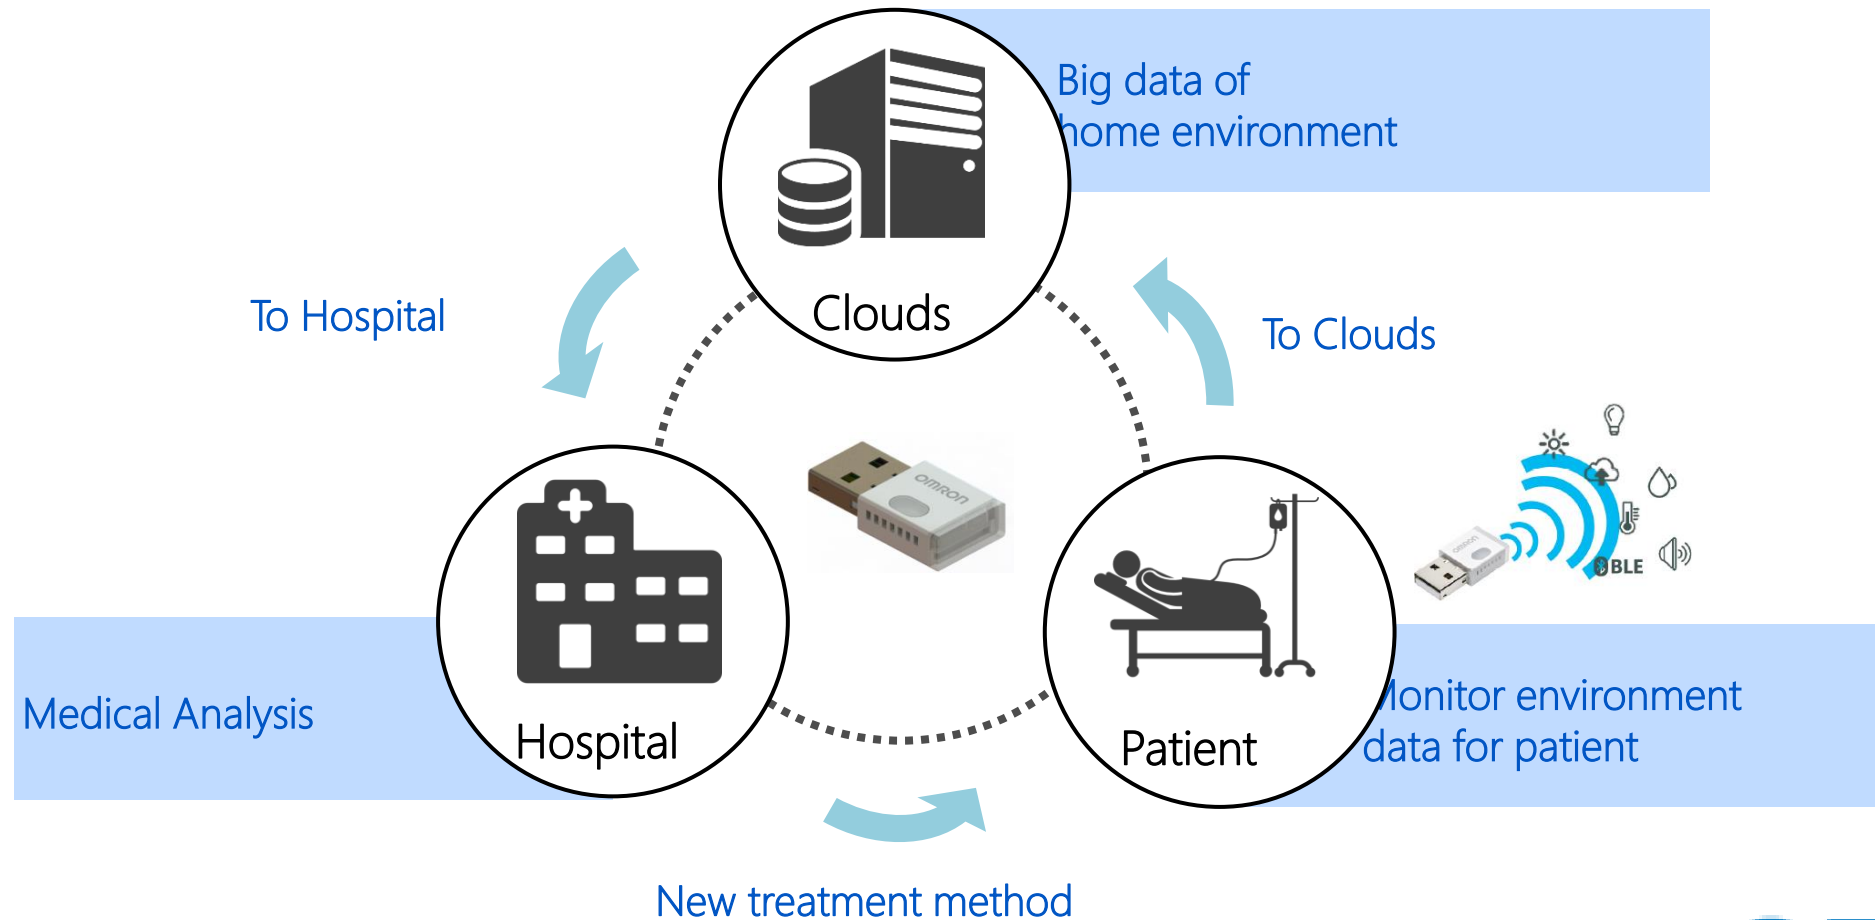

Visualize the environment condition

Analyze environmental conditions to predict asthma attack

2JCIE projects for respiratory

- Monitor the environment data for patient
- Develop new treatment methods from big data analysis

2SMPB projects for respiratory

Smart inhalers – breath detection

Barometric Pressure Sensor
2SMPB-02E

Schematic Diagram

Detect Inhalation

Avoid miscount caused by unintended push by detecting inhalation

Waveform of delivers

Detect Sync of Spray & Inhalation

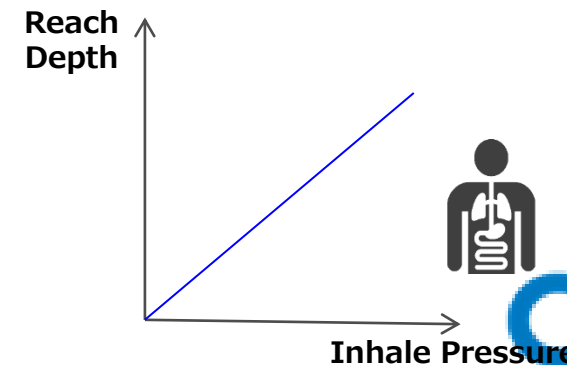

Efficient drug delivery by detecting synchronization of spray and inhalation

Waveform of Delivers

Detect Inhalation Pressure

Support patient to inhale properly by detecting inhale pressure

Inhale Pressure

Air Quality Sensor for respiratory

Air Quality Sensor B5W-LD0101

**High
Sensitivity**

1. Detection of PM2.5 or less possible using LED (minimum 0.5um)
2. Unique flow path which allows particulates to flow through the sensor effectively

Compact

Realize compact package by optimal optical design: 52.3(W) × 39.3(H) × 17.6(D) mm

Light Source: LED
Detective Device: PIC

Technical Outline

Generate ascending current by heater

**Detect
Particulates**

Lead particulates, detect scattered light by particulates and output signal

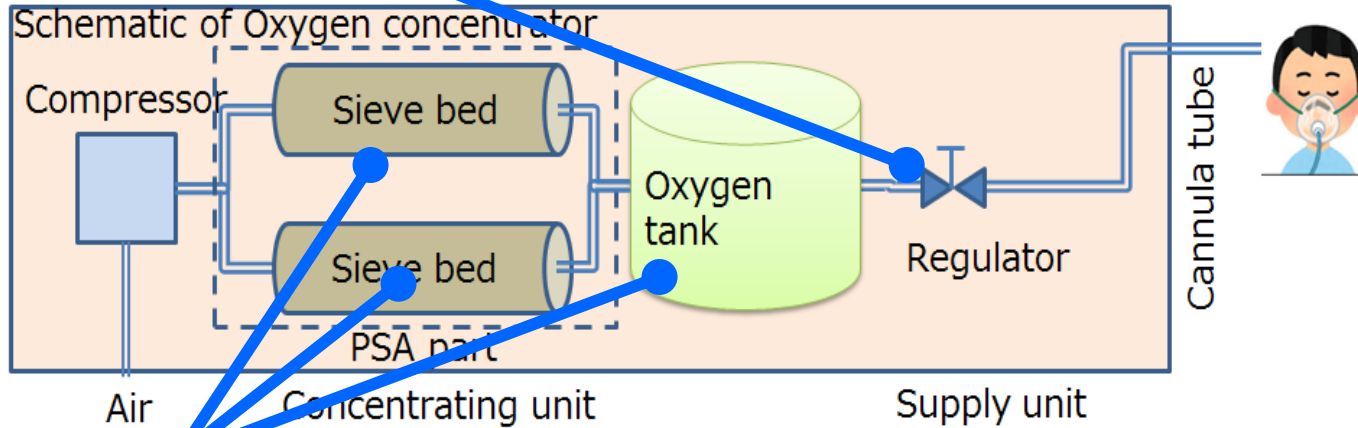

OMRON

Oxygen Therapy

Four Solutions

#1 Oxygen Flow Sensing

#2 Sieve Bed or other pressure sensing

#3 Altitude Correction

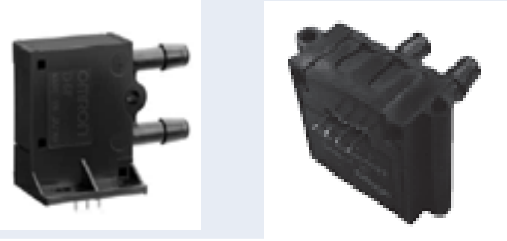

#4 Environment Sensing

21883425

#1. Oxygen Flow Sensing

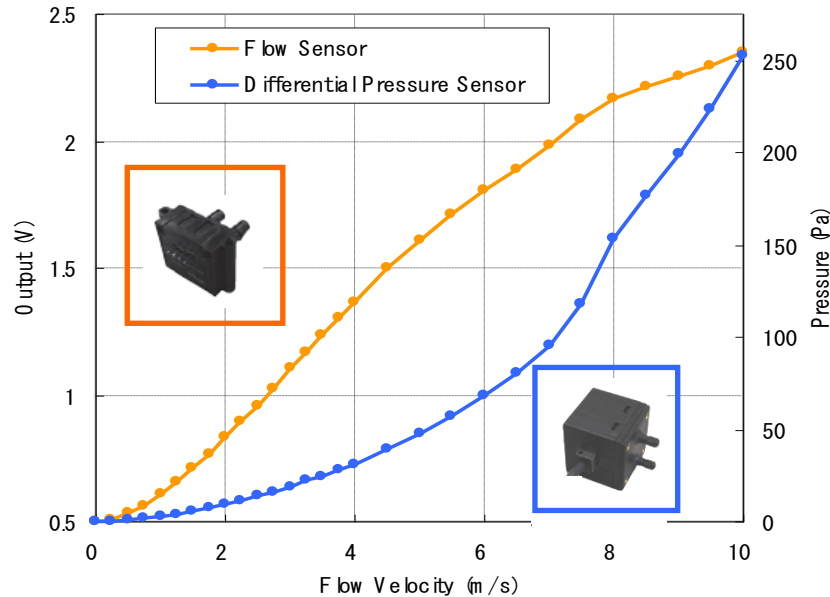

Sensors to detect flow rate

Omron products	D6F-PH / D6F-P
Type	Differential pressure sensor
Object	Flow type Differential pressure
Piping	Bypass
Appearance	
Key Points	1.High sensitivity at low flow range

#1. Flow Sensing

Differential Pressure Type – Model: D6F-PH

Thermal flow type has high sensitivity at low flow rate / pressure condition compare with diaphragm type differential pressure sensor.
Final linearized output is same but accuracy should be effected raw output.

Raw output of sensor

Differential pressure sensor D6F-PH

#2 Sieve Bed or other pressure sensing

Gauge Pressure Sensor

feature

OMRON

MEMS Gauge Pressure Sensor

2SMPP-02

MEMS Gauge Pressure Sensor
Featuring Small Size and Low Power Consumption

- Ultra-miniature 6.1 × 4.7 × 8.2 mm (L × W × H).
- Superior electrical characteristics to capacitive type pressure sensors.
- 0 to 37 kPa pressure range.
 - Offset voltage of -2.5±4 mV
 - Span voltage of 31.0±3.1 mV
- Low Power consumption of 0.2 mW
- Low Temperature Influence
 - Span of ±1.0%FS
 - Offset of ±3.0%FS

RoHS compliant

Refer to the Safety Precautions on page 6.

Terminal Arrangement

Connection Diagram

Note: If necessary, add a variable resistor below the GND pin (3).
The NC pin (2) must be secured to the circuit board.

Points

- Gauge pressure type
- +37kPa, ±50kPa
- Analog output
- SMD
- Bottom insert

#3. Altitude sensing

Absolute Pressure Sensor

Feature

- Small size & Thin package
- High Accuracy
- Digital output through I2C/SPI
- Low current consumption by auto sleep mode

Item	Specification (type : 2SMPB-02E)			Unit	Comment
	Min	Typ	Max.		
PKG size	2.0 x 2.5 x 0.85			mm	
Supply voltage	1.5	2.2	3.6	V	
Current consumption	-	640	800	uA	Sleeping mode; 1.1uA
Usage voltage	-40	-	85	°C	
Accuracy	-	±50	-	Pa	
Interface	I2C / SPI			-	

#4 Environment sensing

1. Dust sensor

Able to detect PM2.5& PM10

1. Concept

High sensitivity & Smaller size Air Quality Sensor

Product Image

*Light source : LED
*detective device : PIC

Features

1. High sensitivity

- 1. Detection of the 0.5um particle is possible using LED.
- 2. The original duct structure that can breathe in the air stably and effectively.

2. Smaller size

Small size by having slimmed an optical design.

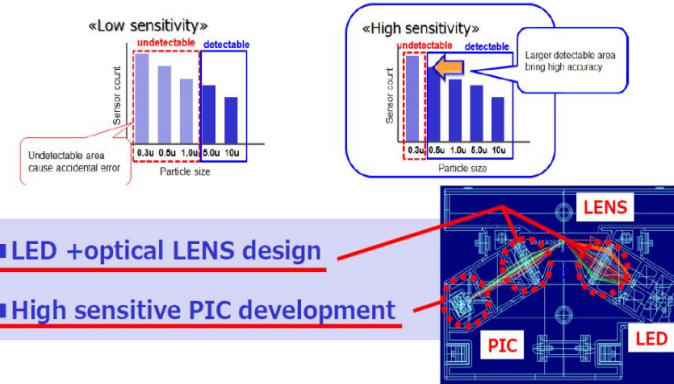

OMRON

2-1. Features [High Sensitivity]

OMRON

The sensor can detect particle of 0.5um dia. by high sensitivity.

⇒It realizes this by Omron's original high sensitive PIC and optical design technology.

2-2. Features [High suction performance]

OMRON

High suction performance design by thermic fluid simulation

⇒ The pulse count increases by high suction performance because it can suck more particle into the sensor.
High pulse count make stable the particle count per period.

OMRON

#4 Environment sensing

2. Environment sensor

Feature

- Low current consumption
- Function
 - Bluetooth low energy
 - 6 sensors
 - Beacon alert

- Temperature
- Humidity
- Pressure
- Light
- UV
- Sound

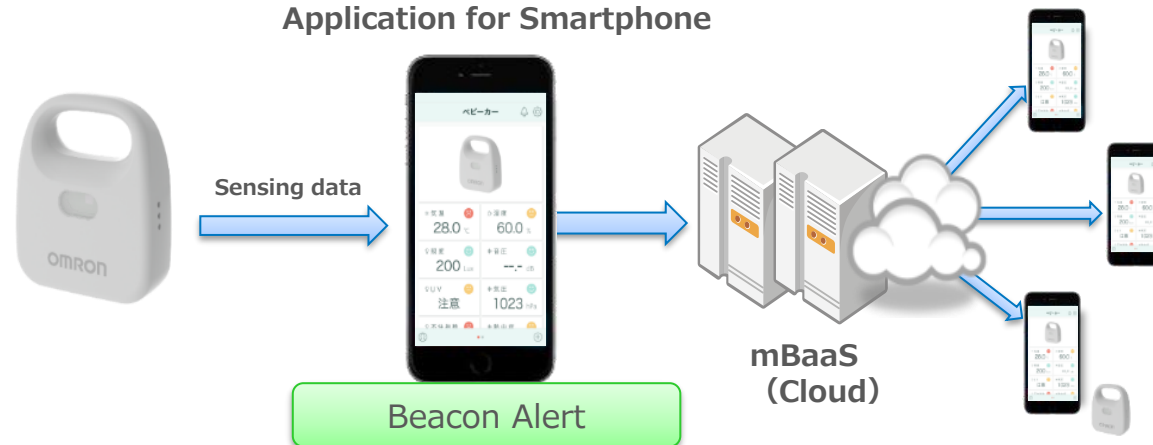

46×39×15mm

Remote monitor through the sever

2JCIE Environment Sensor

Sense a variety of environment information by small package of sensor for comfortable life

Detection Function

World's smallest class package

Monitoring Method (e.g.)

Cloud collaboration accessible on smartphones

- The amount of data captured on smartphones can be stored in the cloud.
- Environmental data can be checked from smartphones in remote locations.

Contribute for a good night sleep

- Heatstroke prevention
- For a good night sleep
-Temperature, Humidity, Light, Noise, VOC and CO2
