

TTI, Inc. – Never Short on Solutions

TTI, Inc. announces availability of M24308 mil/aero 'D-Sub' connector and socket kits

Sept 2013 – TTI, Inc., the world's leading specialist distributor of passive, connector, electromechanical and discrete components, can now offer connectors and socket kits to the M24308 defence connector standard from its European connector assembly facility near Munich, Germany.

The M24308 connector - sometimes termed MIL-DTL-24308 and formerly known as MIL-C-24308 and MIL-PRF-24308 – is a specific version of the well-known D-subminiature connector. Devices are small and light but capable of withstanding the demanding environments experienced by electronic systems used in military applications.

M24308 connectors are available in many different styles and formats with a variety of options in regard to their mounting (rigid or standard), contacts (crimp, pin and socket, solder, or insulation displacement), and type (non-environmental, polarized shell, miniature, rack, and panel). They have a wide temperature range and are designed to operate between -55 and +125degC. Their reliability, strength, and size make them a suitable choice for a number of different industries as well as the military and aerospace sectors. M24308 connectors are used in communications and information technology systems in aircraft missiles and satellites.

About TTI, Inc.

TTI, Inc., a Berkshire Hathaway company, is the world's leading specialist distributor of passive, connector, electromechanical and discrete components. TTI's philosophy is "Lead by Design", and the company differentiates itself by focusing on people, parts and process. TTI in Europe strives to be the distributor of choice for customers and suppliers alike by introducing new product technologies and by stocking broad and deep inventory across its franchise base. TTI's sophisticated inventory management system ensures the ability to service changes in demand due to fluctuating markets and supply chains.
