Announcement of FULL RECOVERY  
From the Eastern Japan Great Earthquake (Final Report)

“We are back!”

Dear \_\_\_\_\_,

Two months have already passed since the great earthquake and tsunami hit Eastern Japan on March 11, 2011. Nippon Chemi-Con’s production facilities in this area were affected by this disaster, some severely. The disruption in our production output has been causing tremendous inconvenience and concerns to you, our valued partners and customers.

In spite of this we received many warm words of encouragement and generous donations from our customers in the world. We were deeply touched by this and we firmly resolved to bring the operations back to normal sooner than anticipated.

Thanks to your tremendous support and cooperation, we are very pleased to announce today that all the production operations have completely recovered to pre-quake levels this week. I would like to express our sincere gratitude for your extraordinary patience and understanding.

Keeping your generous support in our heart, all Nippon Chemi-Con Group employees will exhaust all their efforts to provide superior service.

Concerning the deliveries of your orders, we regret that there are many shipment delays. We will maximize the volume of production by operating on weekends and holidays, but it may take some time before the delivery situation returns to normal. I would like to kindly ask for your continued support and understanding in this matter.

Once again, thank you so much for your patience - We are back!

Sincerely,

Noriaki Kakizaki  
Managing Director, Director of Sales  
Nippon Chemi-Con Corporation
