

Polarized Power Relays

DW Series

Reflow Compatible 16A Relay

DW series is an up to 16A latching relay that offers three basic line-up options. The standard type with a height of 18.8mm provides Pin-in-Paste reflow compability and a switching capability of 8A 250V AC. For applications that require high inrush current up to 100A and switching capability of 16A 277V AC, DW-HL version is the best choice. In addition it offers a lower height of only 15.8mm. Both versions are available as IEC60335-1* compliant types for household and similar electrical appliances.

Key Features

- Small area on PCB - 10 mm width
- Sensitive coil, low power consumption
- TV8 rating
- Reflow compatible
- IEC 60335-1 compliant
- Low profile type (height = 15.8mm)
- UL/C-UL, VDE certified

Smart Meters

- Digital meters

IoT

- Smart plug
- Smart switches
- Light-shutter control

Home Appliances

- Washing machines
- Dishwashers
- Dryers
