

# Enjoy the new Partnership

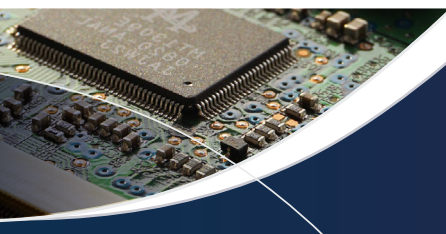

The IP&E  
Specialist

PANJIT is a global manufacturer offering a broad product portfolio, including ICs, MOSFETs, Schottky Diodes, Standard Diodes and Rectifiers, Bridge Rectifiers, Protection Devices, SiC Devices, Bipolar Junction Transistors, and more. This product range suits applications such as power supply, industrial, computing, consumer, and communication. Notably, PANJIT not only holds IATF 16949 certification but also ensures that all its automotive products are AEC-Q101 qualified, which further demonstrates its commitment to quality and its ability to effectively support diverse automotive applications.

TTI supplies the high-quality PANJIT components you need, to add efficiency and reliability to your designs. TTI has an extensive inventory of PANJIT components on the shelves ready to be shipped to our customers.
