SOURIAU support your design with innovative solutions

SOURIAU Technical Solutions

A wide range of standard and derived products for motorsport.

Lightweight

High density layouts, miniature sizes, integrated backshell, composite shell.

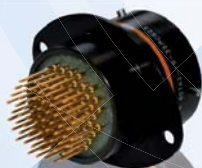

Quick release

Frequent disconnect.
Difficult areas to reach.

Sensors

Extreme vibration.
Restricted areas.

Engine control unit

High power load, critical function.
Extremely reliable in harsh environments.

Power distribution

High voltage, high current.
High power up to 850A.

Custom solutions

Innovative solutions.
Let your need take the lead.

Fuel pump

Fuel, oils and lubricant immersion.
Extremely reliable in continuous immersion.

RELIABLE and CUSTOMIZED Solutions

Based on standard series:

- 8STA & 8TA Series
Derived from MIL-DTL-38999 & JN1003
- 8D Series
MIL-DTL-38999 Series III
- microComp® Series

Unique Capability

Connectors for Motorsport and Racing

SOURIAU services

- High levels of finished connector stock from our worldwide distributors
- Due to the constant innovative needs from the Motorsport market, SOURIAU is dedicated to produce derived products on demand.

New website and e-catalog

- Free and user friendly 3D models downloading
- Powerfull search tool
- Technical data and wiring instructions

The smallest connector with removable contacts

- Shell size 01 with 3 contacts #26
- 20% smaller than a shell size 02
- For wires from AWG 24 to 30
