PRODUCT NEWS

ALL-WET SERIES CONNECTOR ENHANCEMENTS

INTRODUCTION

As part of our continuous improvement process the **SEACON** Group consistently reviews its product ranges through both customer feedback and internal improvements. It is via these processes that **SEACON** identified a design enhancement to the **ALL-WET** connector ranges.

DESIGN FEATURES

The design change is associated with the Male Pin connectors only and has been introduced to improve and extend the life of the connectors by decreasing the stresses that are applied to the sealing interface between the male contact pin and the sealing rubber around the pin during the connectors mate and de-mate cycles.

The newly designed male contact has a "Lead in" as part of the contact pin itself which replaces the current rubber lead in. The introduction of the new pin removes any potential wear to the sealing interface between the male contact pin and the sealing rubber around the pin which may occur with many repeated make and breaks of the connector pairs. The new pin will maintain the full connector sealing properties and will provide a greater life expectancy of the connectors.

The incorporation of this design change to the Male Pin connectors will not affect the existing Female Socket connectors currently being used by **SEACON**'s customers and therefore full intermateability will be maintained. In addition, **SEACON** would also like to confirm that pricing will also not be affected.

Please note that the new Male Pin is not yet available across the entire **ALL-WET** range. Please contact **SEACON** for details.

TESTING

This new pin design concept has been fully tested and has been utilized in both the **U-MATE** and **SEA-MATE** connector ranges for a number of years.

INTRODUCTION

SEACON's **ALL-WET** connector series was developed to provide inexpensive yet reliable rubber molded connectors that allow the user to make and break connections both on the surface and underwater.

Manufactured using only high quality materials, the **ALL-WET** bulkhead connector's metal shell is produced using CA630 per QQ-C 465 as standard, although other materials are available upon request. Contacts are gold plated to ASTM B488 providing superior corrosion resistance.

AVAILABILITY

The **ALL-WET** range offers four different style types; round (AW), split (AW), flat (FAW) and miniature hermaphroditic (MAW) with a number of configurations ranging from 2 to 54 contacts rated upto 50 amps maximum current (dependent on cable) and a mated pressure rating of upto 20,000 psi.

APPLICATIONS

The **ALL-WET** series is suitable for a variety of applications including underwater television and lights, diver communications, ROV systems, recreational submersibles, towed-array cable systems, current meters, animal migration and research and food processing equipment.

PART NUMBER SYSTEM - EXAMPLE**ALL-WET ROUND SERIES BULKHEAD CONNECTORS****SPECIAL ASSEMBLIES**

SEACON maintains all facilities necessary to furnish complete underwater and environmental electrical connector/cable systems, including Research and Development, Engineering, Manufacturing, Quality Control and Pressure Testing.

As well as supplying our standard 'off-the-shelf' items, we have the capability to design and manufacture **SPECIAL CUSTOMIZED CONNECTORS AND CABLE ASSEMBLIES** to suit your individual needs.

SEACON also prides itself with the ability to perform stringent quality conformance testing procedures which are in accordance with the MIL-SPEC programs.

NOTE:

ALL-WET connectors are intended to mate with **ALL-WET** connectors only. Although the **ALL-WET** and **WET-CON** connectors look similar, the numbering pattern and color codes are not the same.

We recommend, as general practice, to verify color code and pin location before installation.

ALL-WET ROUND SERIES IN-LINE CONNECTORS**ALL-WET ROUND SERIES IN-LINE LOCKING SLEEVES****ALL-WET ROUND SERIES BULKHEAD LOCKING SLEEVES****ALL-WET ROUND SERIES DUMMY CONNECTORS**

GENERAL INFORMATION

COMPONENT	MATERIAL
BULKHEAD BODY: STANDARD: OPTIONAL:	CA630 per QQ-C-465 Many materials including 316 Stainless Steel and Glass Reinforced Epoxy (GRE). Other materials available on request
CONNECTOR BODY	Neoprene per B/A X5727
CONTACTS	Copper Alloy Gold Plated per ASTM B488
GUIDE PINS	304 Stainless Steel
O-RINGS	Nitrile (formerly known as Buna N)
IN-LINE CABLE	#18 AWG SO as standard
BULKHEAD PIGTAILS	TFE insulated wire type E hook-up wire

CATEGORY	VALUE
OPEN FACE PRESSURE	Up to 1,000 psi (contact SEACON for higher ratings)
MATED PRESSURE BULKHEADS	Up to 10,000 psi
MATED PRESSURE IN-LINES	20,000 psi
VOLTAGE	600 VDC based on standard cable (contact SEACON for higher ratings)
CURRENT	Up to 50 amps per contact available. Please contact SEACON
CONTACT RESISTANCE	<0.01 ohms
INSULATION RESISTANCE	>500 megohms after wet mating

NOTES:

- Locking sleeves are at additional charge and must be specified. We recommend that bulkhead locking sleeves are specified to be installed at the factory.
- Bulkhead nut/washer is not standard and must be ordered separately. Available in Stainless Steel although other materials are available on request.
- In-line cable and hook up wire is 18 inch as standard, longer lengths to be specified when ordering.
- Please contact SEACON for your non standard cable requirements. Some cables may require terminating to a bulkhead connector and overmolding.

AMPACITY CHART FOR STANDARD PARTS (18 AWG SO CABLE)

PART DESCRIPTION NUMBER OF CONTACTS	AMPACITY

ALL-WET SPLIT SERIES

UNDERWATER ELECTRICAL WET-MATE CONNECTORS

GENERAL INFORMATION

COMPONENT	MATERIAL
BULKHEAD BODY: STANDARD: OPTIONAL:	CA630 per QQ-C-465* Many materials including 316 Stainless Steel, 6A14V Titanium, Glass Reinforced Epoxy (GRE)
CONNECTOR BODY: STANDARD: OPTIONAL:	Neoprene per B/A X5727 Hypalon per B/A X6830
CONTACTS	Copper Alloy Gold Plated per ASTM B488
GUIDE PINS	304 Stainless Steel
O-RINGS	Nitrile (formerly known as Buna N)

CATEGORY	VALUE
OPEN FACE PRESSURE	Up to 1,000 psi
MATED PRESSURE	Up to 10,000 psi
VOLTAGE	Will vary by pattern, determined by the cable
CURRENT	Up to 13 amps per contact**
CONTACT RESISTANCE	<0.01 ohms
INSULATION RESISTANCE	>500 megohms after wet mating
MATING CYCLES	>500 wet matings***

NOTES:

- * Except AWM-2/12S-BC (Standard = 316 Stainless Steel).
- ** Maximum current carrying capacity for contacts may be affected by cable selection.
- *** Provided proper handling procedures are adhered to.
- Locking sleeves are not standard and must be ordered separately. Available in Polyacetal or Stainless Steel.
- Bulkhead nut/washer is not standard and must be ordered separately. Available in Stainless Steel.

MATED PRESSURE IN-LINES	Up to 10,000 psi
VOLTAGE FAW: MAW:	600 VDC except FAWM-10*** 300 VDC
CURRENT FAW: MAW:	Up to 10 amps per contact** Up to 3 amps per contact**
CONTACT RESISTANCE	<0.01 ohms
INSULATION RESISTANCE	>500 megohms after wet mating
MATING CYCLES	>500 wet matings****

NOTES:

- * 18 inch standard length.
- ** Maximum current carrying capacity for contacts may be affected by cable selection.
- *** Rated to 300 VDC.
- **** Provided proper handling procedures are adhered to.

AMPACITY CHART FOR STANDARD PARTS

PART DESCRIPTION NUMBER OF CONTACTS	AMPACITY
FAWL - 2	7 amps
FAWL - 3	7 amps
FAWL - 4	5.6 amps

· Higher ampacities are available.

PART DESCRIPTION NUMBER OF CONTACTS	AMPACITY

PART NUMBER SYSTEM - EXAMPLE

ALL-WET FLAT SERIES BULKHEAD CONNECTORS

ALL-WET FLAT SERIES IN-LINE MP CONNECTORS

ALL-WET FLAT SERIES IN-LINE FS CONNECTORS

ALL-WET FLAT SERIES DUMMY CONNECTORS

Dummy connectors are available for all connectors in the ALL-WET Flat Series. To order, add the suffix-D after the part number.

ALL-WET SERIES FAW-P-BC-R/A

ALL-WET Flat Bulkhead Connector
Mates with FAW-S-MP
Dummy Connector: FAW-S-MPD

ALL-WET SERIES FAW-S-BC-R/A

ALL-WET Flat Bulkhead Connector
Mates with FAW-P-MP
Dummy Connector: FAW-P-MPD

CONNECTOR	A - LENGTH (INCHES)	B - LENGTH (INCHES)	C - LENGTH (INCHES)	D - LENGTH (INCHES)
FAWL-P/S-BC-R/A	1.34	0.50	0.81	1.05
FAWM-P/S-BC-R/A	1.48	0.63	0.95	1.12

NOTES:

- Thread length is 1.00" standard. If shorter thread is required, specify as follows: FAW-P(or S)-BC-R/A (1/2" thread length).
- Available thread length: 1/2", 3/4" and 1".
- Bulkhead mounting torque: 40 inch pounds.
- Nuts and washer supplied.
- Connectors must be lubricated prior to mating.
- Connectors are designed for installation on one atmosphere vessels. Contact SEACON for recommendations if using compensated vessels.
- Dummy Connectors: Optional.
- Dummy Shorting Plug: Optional.

ALL-WET SERIES FAW-P-MP

ALL-WET Flat In-Line Connector
Mates with FAW-S-FS and FAW-S-BC-R/A
Dummy Connector: FAW-S-FSD

ALL-WET SERIES FAW-S-MP

ALL-WET Flat In-Line Connector
Mates with FAW-P-FS and FAW-P-BC-R/A
Dummy Connector: FAW-P-FSD

CONNECTOR	A - LENGTH (INCHES)
FAWL-P/S-MP	0.50
FAWM-P/S-MP	0.63

NOTES:

- Neoprene lanyard wraps around groove on in-line or bulkhead mate.
- Dummy connectors: Optional.
- Dummy Shorting Plug: Optional.
- Connectors must be lubricated prior to mating.

ALL-WET SERIES FAW-P-FS

ALL-WET Flat In-Line Connector
Mates with FAWL-S-MP
Dummy Connector: FAW-S-MPD

ALL-WET SERIES FAW-S-FS

ALL-WET Flat In-Line Connector
Mates with FAWL-P-MP
Dummy Connector: FAW-P-MPD

CONNECTOR	A - LENGTH (INCHES)	B - LENGTH (INCHES)	C - LENGTH (INCHES)	D - LENGTH (INCHES)	E - LENGTH (INCHES)	F - LENGTH (INCHES)
FAWL-P/S-FS	0.81	0.50	0.88	1.31	1.05	1.55
FAWM-P/S-FS	0.98	0.63	0.94	1.33	1.15	1.52

NOTES:

- Dummy Connector: Optional.
- Dummy Shorting Plug: Optional.
- Connectors must be lubricated prior to mating.

ALL-WET SERIES MAW-2-HC w/IN2 CABLE

ALL-WET Miniature Hermaphroditic In-Line Connector
Mates with itself and MAW-2-HC-BC-R/A

ALL-WET SERIES MAW-2-HC w/18/2 SJO CABLE

ALL-WET Miniature Hermaphroditic In-Line Connector
Mates with itself and MAW-2-HC-BC-R/A

NOTES:

- Current-carrying capacity: MAW-2-HC w/IN2 CABLE - 3 amps per contact.
MAW-2-HC w/18/2 SJO CABLE - 7 amps per contact.
- Operating pressure: 10,000 psi.
- Open face pressure: 1,000 psi.
- Working voltage: 300 VDC.
- Dummy Connector: Optional.
- Dummy Shorting Plug: Optional.
- Connectors must be lubricated prior to mating.

ALL-WET SERIES MAW-2-HC-BC

ALL-WET Miniature Hermaphroditic Bulkhead Connector
Mates with MAW-2-HC

NOTES:

- Dummy connector: Optional.
- Dummy Shorting Plug: Optional.
- Pigtails: 18 AWG Type E, 18 inches long.
- Connectors must be lubricated prior to mating.
- Nut and washer: Optional.
- For GRE bulkhead mounting torques please contact **SEACON**. Torque value referenced in this literature assume installation into dry metal threads. For other applications please contact **SEACON** for recommendations.
- Connectors are designed for installation on one atmosphere vessels. Contact **SEACON** for recommendations if using compensated vessels.

ALL-WET SERIES MAW-2-HC-BC-R/A

ALL-WET Miniature Hermaphroditic Bulkhead Right Angle Connector
Mates with MAW-2-HC

NOTES:

- Dummy connector: Optional.
- Dummy Shorting Plug: Optional.
- Connectors must be lubricated prior to mating.
- Nuts and washer supplied.
- Connectors are designed for installation on one atmosphere vessels. Contact **SEACON** for recommendations if using compensated vessels.

ALL-WET SERIES FAW-P/S-BC THROUGH BORE OPTION

ALL-WET Flat Bulkhead Connector

ALL-WET SERIES FAW-P/S-BC THREADED MOUNTING OPTION

ALL-WET Flat Bulkhead Connector

**NOTES:**

- A - Spot face to 32 finish, minimum diameter 1.25 (to be equal to or greater than connector diameter).
- Bore, through or threaded, must be perpendicular to spot face.
- If threaded mount is used, the lead thread chamfer is not to exceed diameter 0.450.

Even though these procedures appear simple, only qualified technicians should perform the installation and maintenance. Connectors are designed for installation on one atmosphere vessels. Contact **SEACON** for recommendations if using compensated vessels.

INSTALLATION PROCEDURES

Torque values referenced in this literature assume installation into dry metal threads. For other applications, please contact **SEACON** for recommendations.

BULKHEAD CONNECTOR (BC): The BC may be installed using one of two methods. The preferred method is to spotface the bulkhead surface and thread the hole, then screw the connector by means of a nut and washer. The bored hole (or threaded hole) should be free of any "burrs" and all o-ring sealing surfaces polished to a number 32 finish. Lubricate the BC o-ring with an appropriate silicone spray or grease before installing. This lubrication should be applied to form an adequate film. Excessive lubrication is detrimental to the operation of the connector. Bulkhead nut, if used, should not be over-torqued.

IN-LINE CONNECTOR: Lubricate the sealing areas around the male pins, using an appropriate silicone spray, or grease lightly.

CARE AND MAINTENANCE

The **ALL-WET** connectors require very little maintenance. They are designed to be used in harsh environments and thus limited amounts of dirt and grit do not affect their performance.

It is recommended that, upon disconnecting or retrieving the system, the connectors be cleaned, to storage (if possible, remate with dummy plugs). Prior to deployment the following maintenance procedure is recommended:

1. Demate the connector set.
2. Flush connector interface with fresh water (deionized water if available), remove all dirt, grit and grease.
3. Inspect for damage in sealing areas, excessive corrosion, debonding of the cable and connector interface and cuts in the cable jacket.
4. Apply thin film of dielectric compound (DC) grease, silicon based, to sealing areas of male connector and across the face of the female connector*. If the BC is removed from its housing then replace facial o-ring and make sure that o-rings are lubricated and in good condition.
5. Mate the connector halves, wipe away any excess grease off the interface line of the mated set.

* **CAUTION:** The use of some oil-based propellants in spray cans can cause conductivity problems in neoprene.

CABLE AND CONTINUITY PRESERVATION

Avoid sharp bends in cables. Cables subjected to vibration or exposed to seawater drag should be adequately clamped to prevent conductor fatigue and ultimate failure.

All reasonable efforts have been taken to ensure that the information contained herein is accurate at the date of publication, but no representation or warranty as to the accuracy or completeness of such information is intended or to be implied by its inclusion herein. Any and all representations and warranties pertaining to the information and products referred to herein shall be set forth in **SEACON** standard sales order form.
