## Notice of Discontinuation of Ceramic Varistor TNR™ Production

Dear TTI,

We regret to inform you that we have decided to discontinue the production of our Ceramic Varistor TNR™ products.

### 1. Overview :

Our company has long been engaged in the ceramic varistor business. However, due to recent changes in the business environment, including significant increases in raw material costs, it has become increasingly difficult to maintain a stable supply at our traditional quality standards and to continue proper business operations. After careful and comprehensive consideration, we have decided to discontinue production.

Therefore, we kindly request that you refrain from adopting these products for any new designs. For existing projects where our products have already been adopted, we will continue to fulfill orders responsibly up to the final order batch in order to minimize any impact on your production plans. We sincerely appreciate for your long-standing support and understanding regarding this matter.

### 2. Target Products : Ceramic Varistor TNR™

### 3. End date : Production will end with shipments made on March 31, 2028.

To ensure a stable supply until production ends, we will gradually transfer the affected products to our factory in Indonesia (P.T.INDONESIA CHEMI-CON). We assure you that all orders will be fulfilled responsibly throughout this transition and up to the final production batch.

### 4. Final Order Acceptance : March 31, 2027

### 5. Others : Requests for investigations concerning various chemical substances will be accepted until March 1, 2028.

If you have any questions or inquiries, please contact our sales representatives.

Sincerely yours,
