

Business Unit: HARTING Electric

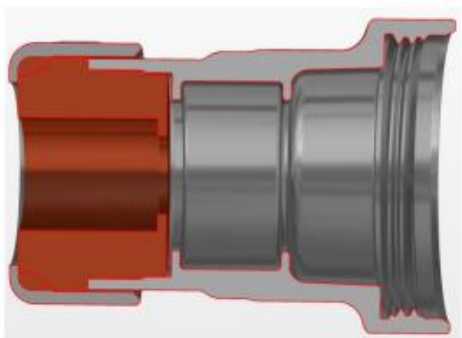

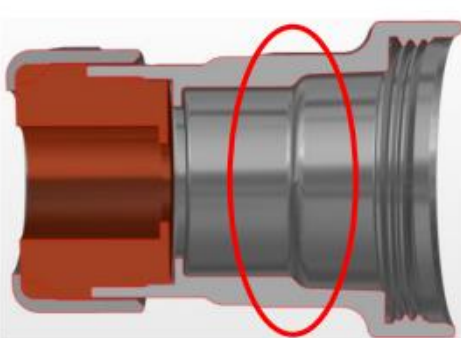

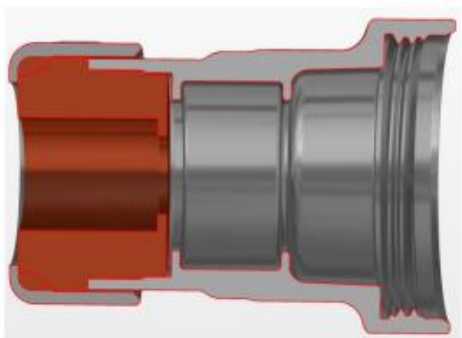

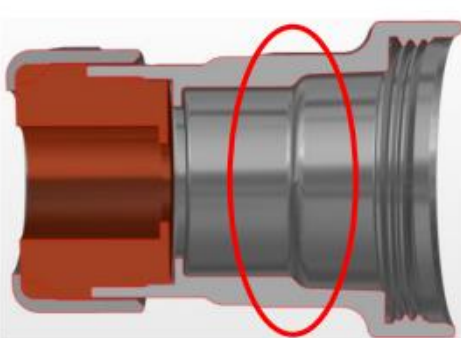

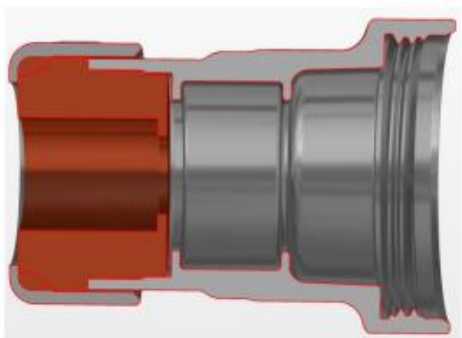

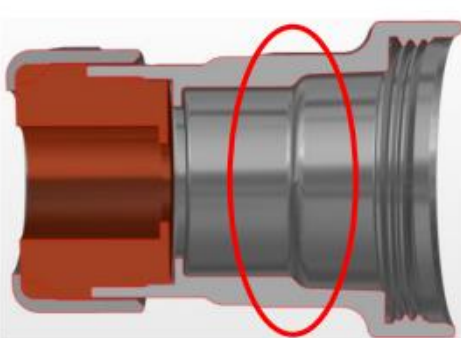

PI00000170-US

Product Range: ICC Size 20 Series

Date: 01/07/2025

Title: ICC Size 20 Product Improvement

Details of the Product Changes

1. Concerned Part Numbers				
19591204011, 19590202801, 19591204012, 19590202802, 19591204013				
2. Description of Changes/News				
<p>We are making a change to the back shell and insert of the ICC Size 20 range to improve the use and customer experience.</p> <p>1. ICC Shell Change</p> <p>Change to the inner contour of the ICC Size 20 Backshell which has no influence on the use of the article. Here an internal contour is changed that was intended for future use as an EMC variant. As this has shown limitations in the use of large cable cross-sections without EMC, we have decided to make this change. Future EMC variants will be given their own article number.</p> <table border="1" style="width: 100%; text-align: center;"> <tr> <td data-bbox="207 1299 782 1332">Old revision</td> <td data-bbox="782 1299 1356 1332">New revision</td> </tr> <tr> <td data-bbox="207 1332 782 1747">  </td> <td data-bbox="782 1332 1356 1747">  </td> </tr> </table>	Old revision	New revision

2. Additional Laser Printing for Coding

An additional laser marking on the mating side makes it easier for the customer to determine the selected coding position in the installed state. This change also has no influence on the use and only serves to optimise handling by the customer.

3. Impact on Product Specification

The technical characteristics according to the datasheet and also the quality characteristics are not affected.

4. Scheduled Date of Implementation

This change will be implemented in Feb. 2025. In the first few weeks, the different revision levels may be mixed.

5. Identification of Change

New revision level

6. Datasheet

For updated specifications and drawings, please check the eCatalogue.
