Notice of Product ECN – 5.7” VGA Source IC Driver Change

Dear Valued Customer,

Thank you for your continued support of Kyocera Display products. As part of our commitment to ensuring product continuity and long-term supply stability, we would like to inform you of an upcoming change impacting several of our display modules. The Source Driver IC currently used in these modules is approaching end-of-life, and Kyocera will transition to a newly designed and internally owned Source Driver IC. This proactive change will allow Kyocera to maintain control over IC production, securing a stable and sustainable supply for the affected products.

Affected Display Modules:

- TCG057VGLCAANN-GN20, TCG057VGLCCANN-GN00, KDA-057-19104-A, TCG057VGLCCANN-GN20, TCG057VGLDDANN-HN50, TCG057VGLDHANN-GN00

Summary of Changes:

We are currently in the process of finalizing the new Source Driver IC design. Our goal is to ensure maximum compatibility with the existing IC to minimize any impact on your systems. A detailed summary of specification changes, along with updated part numbers, will be provided in a follow-up Engineering Change Notice (ECN) once the new Source Driver IC sample evaluation is complete.

Sample and Approval Schedule:

- New Sample Availability: July 2026
- Last Time Buy (Current Source Driver IC): November 14, 2025
- Last Time Ship (Current Display Modules): December 3, 2027

Customer Action Required

Due to the long lead time required for the new IC design, Kyocera will secure sufficient quantities of the current Source Driver IC to support customer demand through the final ship date of December 3, 2027. To assist us in this effort and ensure uninterrupted display module supply, we kindly request that you submit a **binding purchase order** for the current Source Driver IC reflecting the quantity of display modules you anticipate requiring through the last time ship date noted above. Your binding IC order should be placed based on the following.

- IC Part Number: SOURCE DRIVER IC
- IC Cost: \$1.65ea
- Qty Per Display: 1
- Any unused ICs will be invoiced based on the \$1.65 cost

We appreciate your understanding and cooperation as we make this transition. If you have any questions or require further details, please don't hesitate to contact your Kyocera representative.
