

August 25, 2026  
Mr. Heyer  
Product Manager  
TTI Europe

Dear Stefan,

**Subject: Notification of Metallization Supplier Change for Film Capacitors**

We hereby submit an application for approval of a change in the metallization supplier for the EM and QX series film capacitors currently supplied to and used by your company.  
We would be grateful if you could review this application and grant your approval.

1. Applicable products  
Film capacitors EM, QXK, QXP, QXT, QXL series  
Please refer to the attached documents for the applicable part numbers.
2. Reason for change  
This change is necessitated by the withdrawal of the current manufacturer from its metallization business.
3. Details of change  
We will change the metallization supplier for the deposited films (MPP, MPET) used in the applicable film capacitors.  
As there are no changes to the raw film or deposition specifications, the capacitor performance will remain the same.

|                                             | MPP                                          | MPET                                                         |
|---------------------------------------------|----------------------------------------------|--------------------------------------------------------------|
| Base film manufacturer                      | No change                                    | No change                                                    |
| metallization supplier                      | Oji F-Tex Co., Ltd.<br>⇒ Toray KP films Inc. | Oji F-Tex Co., Ltd.<br>⇒ Weihai Sungho Electronics Co., Ltd. |
| Deposited metal                             | No change                                    | No change                                                    |
| metallization specifications                | No change                                    | No change                                                    |
| Specification requirements for the supplier | No change                                    | No change                                                    |
| ※Control values, etc.                       |                                              |                                                              |

4. Regarding the change
  - There will be no change to the series names or part numbers.
  - From April 2027, We plan to switch to the revised products once stocks of the current product have been exhausted.
  - If you have any requests regarding this change, please contact us by the end of November 2026.

Sincerely yours,

Nichicon Austria GMBH  
Nedim Demirtas

Hi PCN-Team,

please find attached Nichicon PCN on Filmcaps for uploading in Product Communicator and further actions on EDC.

I have already checked p/n's setup in EDC and only one p/n is setup -> QXK2J474KTPTZH

Thanks and best regards

Stefan
