

Product change notification (PCN)

Title / short description	Integration of a Lanyard Ring and Packaging Adjustment
Affected article category	Tools
Change category	FIT, Packaging
Change number	CBH260027-00
Reason for PCN/PDN Revision	

Purpose/objective of the change

The purpose of this design change is to improve work safety. By adding a lanyard ring, the tool can be secured with a safety system to prevent it from falling, especially when working at height.

Detailed description of the change

The tool UNIFOX-CT 4.8P (1212609) will be extended by an integrated lanyard ring. This ring is firmly built into the tool and allows the attachment of a fall protection system to prevent the tool from accidentally falling during use.

The main function and performance of the tool, especially cutting performance and handling, remain unchanged. The design change only affects the geometry in the area of the lanyard ring.

As part of this change, the packaging will also be adjusted to fit the updated product shape.

Identifying characteristics
