Voreppe, the 3rd of July 2026**Subject:** Important update regarding R404N05xx series specifications

Dear Valued Customer,

At Radiall, we are committed to maintaining the highest standards of quality and reliability for all our products. We are writing to you today regarding our R404N05xx series to proactively share an update on the technical specifications for this product line.

We are currently optimizing our production processes for the R404N05xx series. To ensure we can consistently meet supply demands while maintaining our commitment to product performance, we have updated the technical datasheet for this series. Please find below a comparison between our previous specifications and our updated performance values:

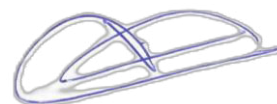

VSWR Performance Details

Frequency (GHz)	Previous Specification	Updated Specification
DC - 8	1.10	1.20
8 - 12.4	1.15	1.25
12.4 - 18	1.20	1.30

These updated specifications reflect our current manufacturing capabilities and will allow us to ensure continuity of supply. Please note that these parts remain fully compliant with their intended applications and quality standards.

We apologize for any inconvenience this update may cause and appreciate your continued partnership. Should you have any technical questions or need further clarification regarding this change, please do not hesitate to reach out to your designated sales representative.

Thank you for your understanding.
Best regards,

Nicolas Pinaud
Product Manager MW
Components

Dear All,

We are currently facing persistent production challenges with the entire R404N05xx range, resulting in a high reject rate. We have been actively working on a technical solution since the beginning of the year to address this topic.

In the interim, and to limit potential losses and manage order expectations, **please inform your customers of updated performance specifications** for this series (see attached document for more detail).

Part Numbers ordered by TTI in the past:

- **R404N05000**
- **R404N05121**
- **R404N05120**

Do not hesitate to contact us if you have any questions.

Kind regards, Eva

Eva Fuchs
