- EVOLUTION DESCRIPTION :

Our supplier, a trusted partner for many years, has chosen to optimize its production site by transitioning from Europe to Asia as part of its long-term strategy.

As this supplier is our sole source for these components, we are committed to ensuring that the quality and specifications of the materials remain consistent throughout this transition.

The material itself remains unchanged; the only difference is the location of production, which will not affect the quality or specifications of the components.

So far, the molding and bonding test plan have been completed successfully, and the product test plan is currently in progress, aligning with our commitment to maintaining the highest quality standards.

A comprehensive Qualification Test Report detailing the test results will be provided upon completion, assuring you of continued performance and reliability.

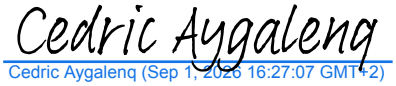

- APPLICATION DATE :

Subject to material availability, the application date is scheduled for October 2026. Radiall will monitor the modifications of the parts using its ERP system.
