TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:

1472050-1=E3418601=COVER

Description of Changes

Raw material change from Trogamid T5000 to Durethan T40ZS. The original qualified material, 27692-1=Trogamid T5000 is now obsolete. The material will change to 2136885-1=Durethan T40ZS, which has been added as an alternate material to 1472050-1 drawing via ECN-26-40407.

Reason for Changes:

Product improvement. Durethan T40, was included in prior EGP/ETR nuclear qualification test report NTS 60291-94N. Durethan T40ZS, is an enhanced version of Durethan T40, but has higher impact resistance and thermal stability. The material change has no impact on form, fit or function. Per 502-1146 Tech Evaluation of EGP and ETR Series Relays, the purpose of this cover is to be transparent and protect the relay assembly.
