TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

Product Description: (Text limited to 120 characters)
SR2M / V23047 Relays

General Description of Changes
>>> Temporary CCC Marking Interruption Manufacturing Location Transfer <<< Dear valued customer, as part of the previously communicated manufacturing location transfer (PCN-26-274543), the new production site is currently being added to the China Compulsory Certificate (CCC). Due to an update in the certification process, completion of this step is taking longer than originally planned. As a result, products shipped from the new location starting 29th of June will be temporarily delivered without the CCC mark. TE Connectivity is fully aligned on completing the certification update, and shipments with CCC marking are expected to resume by end of July. Customers who prefer not to receive shipments without CCC marking are requested to inform their TE representative in writing at the earliest. A further update will be provided once CCC marking is reinstated.

Reason for Changes:
Addition of the new production site is taking longer than originally planned.
